

AIM: Operate primary and ancillary controls in flight; observe and describe their effects.

- | | | |
|-----------|---|--------------------------|
| P | Checklists: Student performs checklist with instructor assistance; no checklists while moving | ☐ |
| <hr/> | | |
| DP | Taxi: Instructor demos basic taxiing, including parallax; student practices | ☐ |
| <hr/> | | |
| D | Takeoff: Instructor conducts; student follows through on ground roll, lift-off, and initial climb | ☐ |
| <hr/> | | |
| D | Stability: Demo during transit – aircraft returns to level; student notes positive pitch stability | ☐ |
| <hr/> | | |
| D | Parallax: Demonstrate horizon picture in left and right 30° bank | ☐ |
| <hr/> | | |
| DP | Elevator: $\pm 10^\circ$ pitch – airspeed/RPM changes; EMPHASISE: pitch controls airspeed ; student practices | ☐ |
| <hr/> | | |
| DP | Ailerons: 30° roll – patter slip, yaw, spiral tendency; student practices | ☐ |
| <hr/> | | |
| DP | Rudder: Yaw – patter skid, roll, spiral tendency; student practices | ☐ |
| <hr/> | | |
| DP | Trim: Demo pressure without trim; show correct direction; student practices | ☐ |
| <hr/> | | |
| DP | Power: From slow flight, full power – pitch up, yaw/roll left; idle – pitch down, yaw/roll right; student practices | ☐ |
| <hr/> | | |
| DP | Flaps: Stage by stage – pitch, increased drag, increased power; retract; student practices | ☐ |
| <hr/> | | |
| DP | Airspeed effect: Student compares control feel at slow flight vs 110 kt | ☐ |
| <hr/> | | |
| D | Upset limits: Safe pitch attitude limits; patter horizon reference | ☐ |
| <hr/> | | |
| P | Scenario: “Using only further effects – pitch the nose up/down; roll left/right” | ☐ |

COMMON ERRORS

- **Overcontrolling** -> Wine glass grip, not beer mug
- **Fixating instruments** -> Horizon is primary; instruments confirm
- **Wrong trim direction** -> Pushing = finger down; pulling = thumb up
- **Missing further effects** -> “Feet follow ailerons” – never aileron alone
- **Poor lookout** -> Horizon, left, front, right, above/below

STANDARDS FOR PROGRESSION

P **Progressing (P):** Controls improving; lookout with prompting; names primary controls

S **Solo (S):** Smooth inputs; lookout starting; names controls unprompted; IMSAFE verbally; ≥ 1 TEM threat verbalised

C **NC:** Persistent gross or opposite inputs

NC

 **SAFETY** Exercises **above 1500 ft AGL** · Ceiling >2000 ft, wind <25 kt · Do not exceed V_{NO} · Pre-select forced landing area
