

AIM: Ground-only lesson. Cockpit familiarisation and pre-flight procedures. No flight conducted.

COCKPIT FAMILIARISATION (ENGINE OFF)

- Correct entry/exit; seat position and locking
- Identify instruments and controls from left seat
- Correct control grip – two fingers and thumb
- Instrument positions and parallax awareness
- Wind correction positions – all four quadrants
- QNH setting procedure

READY FOR LESSON 1 WHEN STUDENT CAN:

- Name all primary controls and primary effects
- Describe further effects of ailerons and rudder
- State correct trim direction for each held load
- State wind correction positions from memory
- Walk through pre-flight inspection sequence
- Explain purpose of each required document

STANDARDS FOR PROGRESSION

P **S**

Progressing (P – ready for L1): Names primary effects; describes further effects with minor prompting; trim direction and wind corrections known

C **NC**

NC: Additional ground session required before Lesson 1

⚠ SAFETY No engine start. No taxi. Walkaround and cockpit familiarisation only. Brief propeller safety before approaching aircraft
