

AIM: Demonstrate all 16 flight elements, W&B, and full flight preparation to C standard before the examiner and be recommended for the issue of a Recreational Pilot Certificate.

ADMINISTRATIVE GATE – EXAMINER MUST SIGHT

- ☐ Logbook complete; all flights entered; all columns complete; all signatures present
- ☐ Total aeronautical experience: **minimum 20 hours**
- ☐ Solo PIC time: **minimum 5 hours**
- ☐ **CFI endorsement** in logbook recommending student for flight test
- ☐ BAK passed (min 80%, KDR recorded)
- ☐ Air Legislation passed (min 80%, KDR recorded)
- ☐ Human Factors passed (min 80%, KDR recorded)
- ☐ Radio passed (min 80%, KDR recorded)
- ☐ Weight and Balance: C standard confirmed in training record
- ☐ All 16 elements at C standard in training record
- ☐ Valid RAAus Student Pilot Certificate; financial membership current; health declaration current

FLIGHT TEST ELEMENT SEQUENCE

- E1: Pre-flight prep, documentation, ground ops
- E2: Effects of controls
- E3: S&L – hdg $\pm 5^\circ$, alt ± 150 ft
- E4: Vy climb; level-off – ASI $+10/-0$ kt; hdg $\pm 5^\circ$
- E5: ≥ 2 descent profiles; correct level-off
- E6: 15° and 30° AoB turns – alt ± 150 ft, rollout $\pm 10^\circ$
- E7: HASSELL; slow flight; stall recognition; incipient recovery
- E8: Takeoff – brief before taxi; directional control; Vy; after-takeoff checks
- E9: 60° steep turns – alt ± 100 ft, rollout $\pm 10^\circ$
- E10: ≥ 2 scenario stalls; HASSELL; height loss ≤ 300 ft
- E11: Normal circuit + EFATO sim + flapless approach
- E12: Landing – gate every approach; touchdown ± 30 m
- E13: All calls correct; transponder; radio failure if tested
- E14: ABCDEF from memory; FLWOP; MAYDAY simulated
- E15: Correct departure and overhead join; airspace managed
- E16: Nose-high and nose-low UA; correct recovery sequence

STANDARDS FOR PROGRESSION

P **S**

RPC issued when: All administrative gate items confirmed. All 16 elements demonstrated to C standard. W&B calculated correctly and within limits before flight. Flight planned and conducted independently – no coaching from examiner

C **NC**

If any element NC: examiner does not recommend; student must remediate and rebook with CFI

⚠ SAFETY All element-specific minima apply. Examiner confirms conditions suitable before proceeding. If conditions deteriorate during test – examiner may terminate and reschedule. Emergency simulations (EFATO, ABCDEF) briefed before flight; student confirms understanding before any simulation is initiated. Examiner has full authority to terminate at any time for safety reasons
